

BOOKMARKS FOR WORLD WIDE WEB DOCUMENTS WITH
INDICATORS OF THE HIT RATES FOR THE WEB DOCUMENTS
FROM THE WEB SITES SENDING THE DOCUMENTS

Abstract

5 Activity rate information of the Web site providing
the Web document at the particular time of day of the
proposed request is presented to a user requesting a Web
document at a receiving Web station so that the user may
choose to request the Web document at a different time if
10 there is an indication of high activity at the Web site
which may cause a delay. Such activity rate information
is presented as an indicator associated with a bookmark
to the document of the proposed request. The rates of
the numbers of specific Web documents transmitted from a
15 source, i.e. hits during daily time cycles are tracked
and indicators of said rates of transmission of said
documents are displayed along with the respective
bookmarks at the time that the selectable bookmarks are
displayed.
